1. The following is an examiner's statement of reasons for allowance: The prior art fails to teach or suggest the invention as claimed. Note that for the limitation to the seal location to be met, element 16 must be considered part of the nozzle tip. As shown in Figure 1, there is a discontinuity between the nozzle body and the nozzle tip, i.e., the horizontal top of element 16 juts out past the slope of the nozzle body, rather than blending smoothly together as in the instant invention. Further, since the nozzle tip of Hollinger includes element 16, the nozzle tip does not continuously converge as in the instant claims, having straight sidewalls above and below the aperture, as well as diverging from the aperture to the straight sidewalls below the aperture.
2. The examiner further notes that the instant method claims have been amended to be commensurate in scope with the apparatus claims, and rejoinder is therefore proper.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jan M. Ludlow whose telephone number is (703) 308-4039. The examiner can normally be reached on Monday-Thursday, 11:30 am - 8:00 pm.
